About

AI Engineer with hands-on experience leading enterprise conversational AI and agentic delivery, including a 25+ agent **Agent Factory** initiative on Microsoft Copilot Studio, AI-powered process automation, and public-sector AI adoption programs. Proficient in **Microsoft Copilot Studio, Power Automate, Cognigy.AI, Kore.ai and Dialogflow**, with strong backend development skills using Node.js. Skilled in leveraging cloud platforms like Microsoft Azure and Google Cloud, along with data visualization tools like Power BI. Currently contributing to agentic AI delivery, presales/RFP support, and multi-channel (WhatsApp/MCP) integrations at **TeKnowledge, India**.

Skills

Conversational & Agentic AI: Microsoft Copilot Studio, Kore.ai (XO & Agent Platform), Cognigy.AI, Dialogflow CX/ES, Generative AI (Agents, Agentic Apps (RAG and LLMs), Generators, Generative Playbook), Vertex AI (Search & Conversation), Google CCAI

Automation & Integration Platforms: Power Automate, Power Apps, Azure Functions, CM.com WhatsApp, MCP Servers, SharePoint, Cognigy WhatsApp, DF Messenger, XO Platform (Search AI, Agent AI, Contact Center AI), Twilio, Adaptive Cards, xApps, Chat SDK

Voice & Telephony: Avaya (AEP/AXP), Phone/Voice Gateway, CCAIP, Genesys, Cisco, Azure Speech Service, Google Speech, Elevenlabs, Soniox

Programming Languages & Frameworks: JavaScript, Node.js, Python (Basic), SQL

Cloud & AI Services: Google Cloud Platform (GCP), Microsoft Azure, OpenAI, Gemini, BigQuery, Firestore, DLP API, STT/TTS APIs

Data Visualization & DevOps Tools: Power BI, Azure Data Studio, Git, GitHub, GitLab, Jira, Gerrit, VS Code, PyCharm

Experience (3+ Years)

AI Engineer - Conversational AI & CX | *TeKnowledge, Gurugram India*

April 2025 – Present

- **Agent Factory Leadership:** Led an internal **Agent Factory** initiative on **Microsoft Copilot Studio** and the broader Microsoft stack (Power Automate, Power Apps, Azure), building and delivering **25+ production-ready AI agents** across **healthcare, banking & BFSI, procurement, HR, and government/public sector** domains, with reusable prebuilt templates to accelerate delivery.
- **AI Delivery, Presales & RFPs:** Owned project scoping, timelines, and effort estimation; defined KPIs and built Power BI dashboards to track agent performance and engagement. Contributed to RFPs/proposals (architecture, sizing, demo storytelling) and built Copilot Studio POCs/demos for presales.
- **Channel Integrations:** Engineered integration patterns connecting Copilot Studio with **CM.com WhatsApp** and **MCP servers** for secure, scalable multi-channel conversational experiences.
- **Technologies and Tools Used:** Microsoft Copilot Studio, Power Automate, Power Apps, Azure Functions, Cognigy.AI, Kore.ai XO Platform, SQL, Power BI, RAG, Search AI, CM.com WhatsApp, MCP Servers, Azure Cloud Services, REST APIs.
- **Key Projects:**
 - * **Travel & Expense Claim Agent – Lead:** Led a Copilot Studio + Power Automate agent that ingests invoices and trip itineraries, extracts line items, and auto-prepares expense claims for user review and submission.

- * **AI-Powered Payment Reconciliation Agent (Microfinance) – Project Lead:** Led an AI reconciliation agent on Copilot Studio and Power Automate – email receipt extraction, SharePoint storage, and matching against bank statements by date, amount, and channel, with manual-approval paths for multi-match cases. Took the solution into production and authored handover documentation.
- * **Service Desk AI Assistant:** Built a service desk chatbot on Copilot Studio with RAG/Search AI via Azure Functions, plus Power Apps and SQL for dynamic workflows and backend data handling.
- * **Public-Sector AI Adoption Program:** Delivered public-facing, multilingual AI agents for citizen services under a national AI adoption initiative, with a focus on government-grade security and scalable rollout.
- * **Idea Management AI Assistant & POCs:** Built a virtual assistant to collect, summarize, and visualize (Power BI) employee suggestions; delivered POCs across marketing, finance, internal learning, banking, and multilingual traffic mobility.

Sr. Conversation AI Specialist | *Avaya (In Association with Bravishma), Pune Maharashtra* May 2024 – April 2025

- **Client Engagement:** Managed technical discussions with clients, providing strategic direction for AI chatbot implementations, Led requirement gathering, technical design, and documentation for multiple projects to ensure robust and scalable solutions.
- **GenAI Chatbot Development:** Delivered multiple Proof of Concepts (POCs) and demos using Cognigy AI chatbot and voicebot solutions for global organizations, incorporating WhatsApp and voicebot integration with xApps capabilities.
- **Agentic AI Chatbot:** Developed a GenAI-based POC chatbot using Dialogflow CX with a custom RAG model, enhancing it into an Agentic AI chatbot.
- **Automation & Testing:** Contributed to building a GenAI-powered automation testing tool to streamline bot development and quality assurance processes.
- **Technologies and Tools Used:** Cognigy.AI, Dialogflow CX, Adaptive Cards, OpenAI APIs, HTML, CSS, NodeJS, GCP Cloud Functions, and secure API integrations.
- **Key Projects:**
 - * **AI Assistant for Police:** Developed and deployed a multilingual AI assistant using Cognigy AI to enhance citizen engagement and service delivery. Integrated secure APIs and optimized conversational flows for a seamless user experience.
 - * **AI Assistant for Airways Org:** Created a POC integrating Dialogflow CX and Cognigy to assist passengers during their journeys. Implemented API calls through GCP Cloud Functions, developed chatbot solutions, and utilized OpenAI models for smarter responses.

Sr. Conversation Bot Engineer | *Quantiphi, Mumbai Maharashtra* Feb 2022 – April 2024

- **Leadership & Strategy:** Led a team of Conversation Bot Engineers to develop production-grade virtual agents while guiding solution architecture, technical design documentation, and project strategies, Managed client meetings focused on conversation design, technical discussions, and discovery sessions for new and next-phase solutions. Identified risks and dependencies with third-party integration vendors.
- **Virtual Agent Development:** Designed and developed virtual agents using Google Dialogflow across elections, healthcare, and insurance domains for both private and public sectors.
- **Integration & Custom Solutions:** Created custom integrations with service providers like Avaya, Genesys, Cisco, and phone gateways. Integrated Dialogflow Phone Gateway with Firestore DB and third-party APIs.
- **Technologies and Tools Used:** Google Dialogflow CX and ES, Firebase, GCP services (BigQuery, Firestore), Genesys, JavaScript, Git, SOAP APIs, and Avaya telephony integrations.
- **Key Projects:**
 - * **Electoral Chat and Voice Bot:** Developed a Dialogflow CX chatbot and voice bot solution for a US county, integrated with Google Maps, and provided real-time Agent Assist features to reduce customer care costs.
 - * **Healthcare Multilingual Voice Bot:** Built and deployed a Dialogflow CX virtual agent integrated with Genesys telephony for a healthcare organization, supporting English and Spanish. Implemented BigQuery and SOAP API integration for authentication.
 - * **Healthcare Voice Bot:** Developed and optimized a Dialogflow ES-based solution for a healthcare organization, automating IVR queues and enhancing the customer experience through seamless Avaya telephone integration.

Education

Institute of Engineering and Technology, DAVV, Indore
Bachelor of Engineering, Civil Engineering

May 2022
CGPA: 8.97/10

Certificates

- GCP-Associate Cloud Engineer (03/2023 - 02/2026)
- Kore.ai XO Platform & Agent Platform
- Cognigy.AI Developer Course & Cognigy.AI Foundation Course
- CCAI - Google Cloud
- Dialogflow ES - Google Cloud & Dialogflow CX - Google Cloud
- Conversational AI on Vertex AI and Dialogflow CX
- JavaScript -Udemy
- SQL - Udemy

Professional Achievements

- Received Global R&R Award - Kaizen Award for my performance at Quantiphi. (08/2023)
