About

AI Engineer with hands-on experience in designing and developing conversational AI solutions—including chatbots and voice bots—for automating customer communication across text and voice channels. Proficient in platforms such as **Cognigy.AI, Kore.ai, Microsoft Copilot Studio and Dialogflow**, with strong backend development skills using Node.js. Skilled in leveraging cloud platforms like Microsoft Azure and Google Cloud, along with data visualization tools like Power BI. Currently contributing to innovative AI-driven automation and customer service solutions at **TeKnowledge, India**.

Skills

Conversational AI Skills: Kore.ai (XO & Agent Platform), Cognigy.AI, Microsoft Copilot Studio, Dialogflow CX/ES, Generative AI (Agents, Agentic Apps (RAG and LLMs), Generators, Generative Playbook), Vertex AI (Search & Conversation), Google CCAI

Voice & Chatbot Integrations: Avaya (AEP/AXP), XO Platform (Search AI, Agent AI, Contact Center AI), Phone/Voice Gateway, CCAIP, Cognigy WhatsApp, DF Messenger, Twilio, Adaptive Cards, xApps, Chat SDK, Azure Speech Service, Google Speech, Elevenlabs, Soniox

Programming Languages & Frameworks: JavaScript, Node.js, Python (Basic), SQL

Cloud & AI Services: Google Cloud Platform (GCP), Microsoft Azure, OpenAI, Gemini, BigQuery, Firestore, DLP API, STT/TTS APIs

Data Visualization & DevOps Tools: Power BI, Azure Data Studio, Git, GitHub, GitLab, Jira, Gerrit, VS Code, PyCharm

Experience (3 Years)

AI Engineer - Conversational AI & CX | *TeKnowledge, Gurugram India*

April 2025 – Present

- **AI Delivery Team:** Contributed as part of the AI delivery team to design, develop, and deploy enterprise-grade conversational AI solutions. Actively participated in project scoping, timeline planning, and effort estimation to ensure efficient and timely delivery. Defined KPIs and designed interactive Power BI dashboards to monitor chatbot performance, user engagement, and operational effectiveness.
- **Presales Team:** Collaborated with the presales team to design and develop conversational AI POCs/demos across multiple platforms, showcasing product capabilities and platform strengths to customers.
- **Agentic AI Chatbots:** Designed and built automated agentic chatbots leveraging RAG and LLM technologies, using frameworks such as Cognigy.AI, Microsoft Copilot Studio, and Kore.ai XO Platform.
- **Technologies and Tools Used:** Cognigy.AI, Microsoft Copilot Studio, Kore.ai XO Platform, Azure Functions, Power Apps, SQL, Power BI, RAG, Search AI, Azure Cloud Services, REST APIs.
- **Key Projects:**
 - * **Service Desk AI Assistant:** Designed and developed a service desk automation chatbot using Microsoft Copilot Studio. Implemented RAG and advanced Search AI capabilities with Azure Functions for intelligent knowledge retrieval. Integrated Power Apps and SQL databases to enable dynamic workflows and efficient backend data handling, improving support speed and accuracy.
 - * **Idea Management AI Assistant:** Developed a virtual assistant to collect and summarize employee suggestions within an organization. Aggregated and visualized ideas using Power BI dashboards to support stakeholder review, prioritization, and implementation planning.
 - * **Proof of Concepts (POCs):** Developed multiple POCs across diverse domains including marketing, finance, internal learning portals, banking, and multilingual traffic mobility solutions to demonstrate product capabilities and drive stakeholder engagement.

- **Client Engagement:** Managed technical discussions with clients, providing strategic direction for AI chatbot implementations, Led requirement gathering, technical design, and documentation for multiple projects to ensure robust and scalable solutions.
- **GenAI Chatbot Development:** Delivered multiple Proof of Concepts (POCs) and demos using Cognigy AI chatbot and voicebot solutions for global organizations, incorporating WhatsApp and voicebot integration with xApps capabilities.
- **Agentic AI Chatbot:** Developed a GenAI-based POC chatbot using Dialogflow CX with a custom RAG model, enhancing it into an Agentic AI chatbot.
- **Automation & Testing:** Contributed to building a GenAI-powered automation testing tool to streamline bot development and quality assurance processes.
- **Technologies and Tools Used:** Cognigy.AI, Dialogflow CX, Adaptive Cards, OpenAI APIs, HTML, CSS, NodeJS, GCP Cloud Functions, and secure API integrations.
- **Key Projects:**
 - * **AI Assistant for Police:** Developed and deployed a multilingual AI assistant using Cognigy AI to enhance citizen engagement and service delivery. Integrated secure APIs and optimized conversational flows for a seamless user experience.
 - * **AI Assistant for Airways Org:** Created a POC integrating Dialogflow CX and Cognigy to assist passengers during their journeys. Implemented API calls through GCP Cloud Functions, developed chatbot solutions, and utilized OpenAI models for smarter responses.

Sr. Conversation Bot Engineer | *Quantiphi, Mumbai Maharashtra*

Feb 2022 – April 2024

- **Leadership & Strategy:** Led a team of Conversation Bot Engineers to develop production-grade virtual agents while guiding solution architecture, technical design documentation, and project strategies, Managed client meetings focused on conversation design, technical discussions, and discovery sessions for new and next-phase solutions. Identified risks and dependencies with third-party integration vendors.
- **Virtual Agent Development:** Designed and developed virtual agents using Google Dialogflow across elections, healthcare, and insurance domains for both private and public sectors.
- **Integration & Custom Solutions:** Created custom integrations with service providers like Avaya, Genesys, Cisco, and phone gateways. Integrated Dialogflow Phone Gateway with Firestore DB and third-party APIs.
- **Technologies and Tools Used:** Google Dialogflow CX and ES, Firebase, GCP services (BigQuery, Firestore), Genesys, JavaScript, Git, SOAP APIs, and Avaya telephony integrations.
- **Key Projects:**
 - * **Electoral Chat and Voice Bot:** Developed a Dialogflow CX chatbot and voice bot solution for a US county, integrated with Google Maps, and provided real-time Agent Assist features to reduce customer care costs.
 - * **Healthcare Multilingual Voice Bot:** Built and deployed a Dialogflow CX virtual agent integrated with Genesys telephony for a healthcare organization, supporting English and Spanish. Implemented BigQuery and SOAP API integration for authentication.
 - * **Healthcare Voice Bot:** Developed and optimized a Dialogflow ES-based solution for a healthcare organization, automating IVR queues and enhancing the customer experience through seamless Avaya telephone integration.

Education

Institute of Engineering and Technology, DAVV, Indore
Bachelor of Engineering, Civil Engineering

May 2022
CGPA: 8.97/10

Certificates

- GCP-Associate Cloud Engineer (03/2023 - 02/2026)
- Kore.ai XO Platform & Agent Platform
- Cognigy.AI Developer Course & Cognigy.AI Foundation Course
- CCAI - Google Cloud
- Dialogflow ES - Google Cloud & Dialogflow CX - Google Cloud
- Conversational AI on Vertex AI and Dialogflow CX
- JavaScript -Udemy
- SQL - Udemy

Professional Achievements

- Received Global R&R Award - Kaizen Award for my performance at Quantiphi. (08/2023)
